Of Workshop Participation

BUILDING A WEBSITE WITH **BOOTSTRAP**

Presented To

Amjadh

The student has successfully completed the workshop in "Building a Website with Bootstrap," gaining essential skills in responsive web design and front-end development. This training covered the fundamental concepts of Bootstrap, including its grid system, components, and utilities, enabling the student to create visually appealing, mobile-friendly websites. Through hands-on exercises, the student developed a strong understanding of structuring web pages, customizing layouts, and integrating Bootstrap's pre-built components to enhance user experience and functionality.
